At GRAMONNATI, we aim to support rural transformation through technology and entrepreneurship. Our mission is to develop 10000 rural entrepreneurs amongst youth, women and retired soldiers.

VIDYA-JYOTI is a program designed to improve the quality of education in rural schools.

We are working in border districts of RAJOURI and POONCH in J&K with support from Indian Army and Civil Administration to roll-out the Vidya Jyoti solution in 15 selected schools as a Pilot Project. Four of these schools have gone live with Vidya Jyoti solution and the remaining are being deployed in next 60-90 days.

- Quality Education via Technology for Schools/Community Spaces
- Joyful Learning Experience for Children
- Improves Engagement and Learning Outcomes
- Combination of Offline Rich Media Content & Online Teaching
- Easy to setup and operate
- Low cost, High value, Scalable

SOLUTION

Vidya Jyoti solution consists of:

- 4000 high-quality educational videos (E-pathshala) for NCERT syllabus for Class 5-10 for Mathematics, Science and English in Hindi and English medium.

- Digital classroom from E-Vidyaloka that provides interactive guidance and sessions through video-conferencing with the support of experienced volunteer teachers.

- The model uses local UDYAM trainees to manage the solution in a district.

- The solution can operate in remote schools where internet and electricity are a challenge.

FEATURES

- Low-cost and simple-to-use technology
- High-value digital knowledge for students
- Teacher enablement trainings
- Trainings on life skills, counseling and spoken English for both teachers & students
- Support of experts and experienced teachers
- Development of rural entrepreneurship
- Strong back end monitoring and measuring

BENEFITS AND IMPACT

- Improvement in quality of education in rural and remote schools by enabling the teachers and bringing high quality educational content to the students.
- Bring awareness and adoption of digital technology in the village school that will be a key enabler for self-learning for participating students and teachers.
- Development of rural entrepreneurs in digital education.

ROLE-OUT

YEAR 1:
Roll-out the solution in 80 - 100 schools in J&K, Bihar and Madhya Pradesh.

YEAR 2:
Expand the breadth of knowledge services in each village deployment (healthcare, digital services, digital financial services, water management) and scale up the solution to 1000 rural schools
